GYROLOK®

Flange Connector:

For Your Safety

It is solely the responsibility of the system designer and user to select products suitable for their specific application requirements and to ensure proper installation, operation, and maintenance of these products. When selecting products, the total system design must be considered to ensure safe, trouble-free performance. Material compatibility, product ratings and application details should be considered in the selection. Improper selection or use of products described herein can cause personal injury or property damage.

Contact your authorized HOKE® sales and service representative for information about additional sizes and special alloys.

SAFETY WARNING:

HOKE® products are designed for installation only by professional suitably qualified licensed system installers experienced in the applications and environments for which the products are intended. These products are intended for integration into a system. Where these products are to be used with flammable or hazardous media, precautions must be taken by the system designer and installer to ensure the safety of persons and property. Flammable or hazardous media pose risks associated with fire or explosion, as well as burning, poisoning or other injury or death to persons and/or destruction of property. The system designer and installer must provide for the capture and control of such substances from any vents in the product(s). The system installer must not permit any leakage or uncontrolled escape of hazardous or flammable substances. The system operator must be trained to follow appropriate precautions and must inspect and maintain the system and its components including the product(s) and at regular intervals in accordance with timescales recommended by the supplier to prevent unacceptable wear or failure.

GYROLOK® Flange Connectors

GYROLOK® flange connectors provide a simple, safe interface between pipe flanges and instrument fittings, eliminating the need for pipe threading or welding. This design incorporates GYROLOK® Tube Fitting with a standard flange assembly. The flange end is dimensioned to meet ANSI B16.5 Pressure Classes 150, 300, 600, 1500, and 2500. Available in 316 stainless steel, Duplex UNS S31803, HASTELLOY® C-276, INCONEL®, MONEL®, and other superior alloys. Available in both Raised Face and Ring Joint flange configuration.

Technical Data

| STANDARD MATERIAL* | 316 stainless steel, Duplex UNS S31083, INCONEL®, HASTELLOY® C-276, MONEL® |

| GYROLOK® FITTINGS | ¹ / ₄ ", ³ / ₄ ", ¹ / ₂ ", ³ / ₄ ", 1" (Standard) 6, 8, 10, 12, 18, 20, 25mm (Metric) |

Consult factory for other materials

Features

- Meets ANSI B16.5 Pressure Class 150, 300, 600,1500, and 2500 requirements for pipe flanges and flange fittings.†
- Includes GYROLOK® fittings 1/4", 3/8", 1/2", 3/4", 1" & 6mm, 8mm, 10mm, 12mm, 18mm, 20mm, 25mm
- One-piece integral body.
- Use for transitions from process lines to instrumentation lines.
- See page 67 for options.
- Special High Tolerance NPT Thread

Class 150/300/400/600/900/1500/2500 Ring Joint Flange X Metric Male GYROLOK®

Pressure Temperature Ratings

To determine pressure ratings for fittings with a flange end connection and a second end connection, use the lower of the two pressure ratings. Below ratings are for 316SS. For other materials and classes, refer to ASME B16.5-2009.

| | | WORKI | NG PRESSUR | E (PSIG) | |

Pressure ratings are according to ASME B16.5-2009, Tables 2-2.2 and 112-2.2.

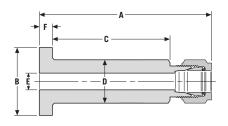

Options

Lapped Flange Connectors

The Lapped Flange Connector is used to allow safe and simple connections between process lines and instruments. The basic, one-piece unit consists of a GYROLOK® tube connection end and a ½″ lap joint pipe flange. The flange end is dimensioned to meet ANSI 2500 flange specifications. Available in "Smooth" or "Serrated/Concentric" seal faces, and in 316 stainless steel, HASTELLOY® C-276, or MONEL®.

GYROLOK® **Tube Fittings** See the GYROLOK® Tube Fittings catalog #79002 for product information, assembly instructions, and guarantee of interchangeability with certain other manufacturers.

GYROLOK® components are guaranteed to be interchangeable with certain other suppliers. For more information, visit www.hoke.com or contact your local HOKE® distributor.

For Your Safety

It is solely the responsibility of the system designer and user to select products suitable for their application requirements and to ensure proper installation, operation, and maintenance of these products. Material compatibility, product ratings and application details should be considered in the selection. Improper selection or use of products described herein can cause personal injury or property damage.

Assembly Instructions

0-1/2" (12mm) **MANUAL ASSEMBLY**

½" – 1" (12mm-25mm) MANUAL OR HPST ASSEMBLY based on installation conditions

Above 1" (25mm) **HPST ASSEMBLY REQUIRED** Consult factory as needed

Manual Assembly Instructions

Use of a PST (Manual Pre Setting Tool) is recommended GYROLOK® Marking Tool (GMT) is strongly recommended.

Fully insert a correctly cut, deburred tube into the PST or fitting body until the tube rests on the sizing angle.

Holding the tube in the PST or Body, extract the nut and ferrules to visually ensure both ferrules are correctly oriented.

Once correct ferrule orientation is confirmed, thread & rotate the nut onto the PST or Body until handtight. The GMT witness line should **NOT** be visible.

Establish a reference point for wrench tightening by marking both the fitting body and nut.

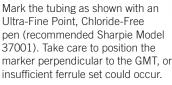

While supporting the PST or fitting body, tighten the nut with a wrench 1¼ turns. The pre-set or make-up is now complete. Confirm that the GMT witness line is now visible.

GYROLOK® MARKING TOOL (GMT) INSTRUCTIONS

Insert the correctly cut and deburred tube into the GMT as far as possible.

HPST Assembly Instructions

GYROLOK® Marking Tool (GMT) is strongly recommended.

Ensure the HPST Tooling Set is installed with the proper indicator nut.

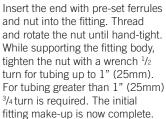

Fully insert a correctly cut, deburred tube into the HPST head. Visually ensure both ferrules are correctly oriented. Thread & rotate the nut until hand-tight.

Set the indicator arm in the operating position by rotating the Indicator Nut counter-clockwise until it stops.

Pump the handle until the indicator arm releases. **CAUTION:** Stop pumping immediately after the arm releases, as over-pumping may cause the tube to swell and stick. Pre-setting is now complete.

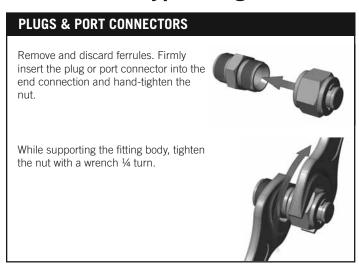

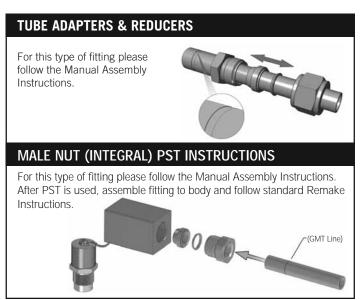

REMAKE INSTRUCTIONS

Firmly insert end with the correctly set ferrules & nut into the fitting. Thread & rotate the nut until hand-tight. The GMT witness line should NOT be visible.

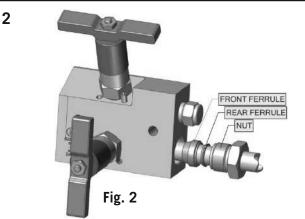

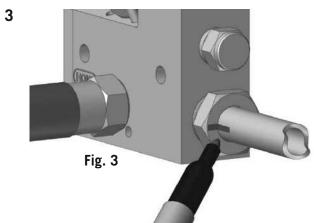

Integral GYROLOK® Assembly Instructions (1/2" and below)

MANUAL ASSEMBLY INSTRUCTIONS 2 Fig. 1

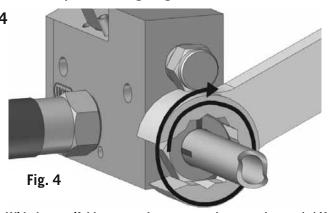

Fully insert the tube into the manifold body.

Holding the tube in place, loosen the nut until it can be pulled over the tube. Extract the ferrules from the manifold body to ensure the front and rear ferrules are in the correct orientation (see Fig. 2). Once correct ferrule orientation is confirmed, slide the nut into place and finger tighten the nut.

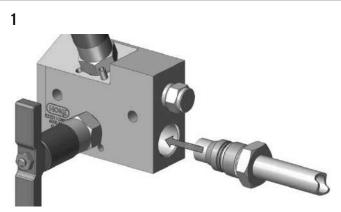

Make sure the nut is finger-tight and then establish a consistent point for the wrench tightening by marking the tube and nut.

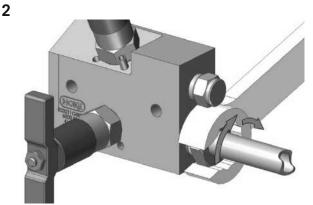

With the manifold supported use a wrench to turn the nut 1-1/4 turns, clockwise, from the finger-tight position. When finished, the mark line on the nut should be 90 degrees clockwise from the marked line on the tubing. Assembly is complete.

REMAKE INSTRUCTIONS

Insert the tube with the nut and ferrule assembly attached. Tighten the nut finger-tight.

With the manifold supported use a wrench to turn the nut clockwise until there is a sudden rise in torque and then make an additional 1/8 of a turn.

We Care About Your Safety

WARNING

Improper selection or use of products described herein can cause Personal injury or property damage

Product information described herein is offered for use by the system designer and user.

It is solely the responsibility of the system designer and user to select products suitable for their specific application requirements and to ensure proper installation, operation and maintenance of these products. Material compatibility, product ratings, and application details should be considered in the selection.

Always contact your local HOKE® Distributor with any questions you may have before pressurizing and operating the product.

Safety Instructions

- 1. Do not tighten or loosen any part of a fitting or valve when the system is pressurized. Make sure the system is un-pressurized when tightening or loosening a fitting or valve connection.
- 2. Do not loosen GYROLOK® nut or any product component in order to relieve or bleed down system pressure.
- 3. Do not exceed pressure-temperature specifications stated in the appropriate catalog.
- 4. When the application involves use of a toxic or hazardous fluid, exercise extra caution during operation and maintenance.
- 5. Before assembling new, unused GYROLOK® tube fitting ends, loosen the GYROLOK® nut before inserting the tube to allow full insertion of the tube to the base of the body bore.
- 6. Always use tubing that is compatible with the fitting or valve material. Tubing appropriate for use with HOKE® products is described in Tubing Data Charts. For example, use 316 Stainless Steel fittings with 316 Stainless Steel tubing.
- 7. Always leave a length of straight tube between the tube bend and the fitting. A tube bent too close to the fitting connection may be a source of leakage.
- 8. During assembly of the GYROLOK® tube end, always hold the fitting or valve body with one wrench while separately wrench tightening the GYROLOK® nut. Follow the same precaution when disassembling.
- 9. Always use a HOKE® tube insert (basic part number "TI") when assembling a GYROLOK® fitting to soft, pilable plastic tubing.
- 10. Always use proper thread lubricants or sealants on tapered pipe threads. Note that thread sealants may have lower temperature ratings than the basic fitting.
- 11. When installing an NPT ended valve, hold the valve body near the connection with one wrench, while separately wrench tightening the mating pipe. Turn the pipe, not the valve. Follow the same precaution when disconnecting.
- 12. Do not hold the valve handle when tightening an end connection.
- 13. Do not use excessive force to open or close a ball valve e.g. do not use a handle extension.
- 14. On initial installation, valves may require an adjustment of the packing nut due to storage variations, systems parameters, and cold flow properties of TFE.

The Small Bore Instrumentation Specialists

We specialize in small bore instrumentation products up to 2" that deliver benchmark performance quality & safety; provide the broadest array of superior alloy offerings in the market; decades of proven success in a wide range of industries; a roster of "who's who" customers & projects globally; original "Best Solution" engineering & designs; and are focused on continuous improvement in all aspects of our business.
